SKILLS

- **Languages**: Java, C++, JavaScript.
- **Tech:** React.js, Node.js, Express.js, Spring Boot, HTML5, CSS3, TailwindCSS.
- **Database:** MySQL, PostgreSQL, MongoDB.
- **Tool and API:** Git/GitHub, Postman, Socket.IO, and RESTful APIs.
- **Soft Skills:** Problem Solving, Team Collaboration, Adaptability, Cross-functional Communication.

INTERNSHIP

C++ – Demo Explanation Page| Certificate — Jun 2025 - Jul 2025

Technical Content Creator

- Delivered an in-depth, beginner-friendly breakdown of C++ fundamentals, covering syntax, variables, data types, operators, conditionals, loops, functions, arrays, pointers, and memory management.
- Guided core object-oriented principles, including classes, objects, constructors, inheritance, polymorphism, abstraction, and encapsulation.
- Simplified advanced topics like Standard Template Library (STL), file handling, and dynamic memory management to build strong foundational knowledge.
- Coordinated live sessions using real-world analogies, live coding examples, and step-by-step explanations to help students prepare for placements, exams, and coding interviews.

PROJECTS

AI Short Video Ads Generator | Link — Feb 2026 - Present

- Building a full-stack SaaS platform that allows users to generate short promotional videos from simple text prompts using AI-powered script and content generation.
- Integrating Google Gemini API to automatically create ad scripts, visuals, and video content based on user input.
- Designing a responsive React interface with secure authentication, project management, and a clean dashboard for managing the generated video ads.
- Engineering RESTful APIs using Node.js , Express with PostgreSQL for structured data storage and scalable backend operations.
- **Tech Stack:** React, Node.js, PostgreSQL, Gemini API

Startrack – Real-Time Issue Tracking System | Link — Feb 2026 - Feb 2026

- Architected a real-time issue and incident tracking platform to manage system events, priorities, and status workflows.
- Designed RESTful APIs and MongoDB schemas to handle incident creation, updates, and filtering with secure JWT-based authentication.
- Implemented live issue status updates and dynamic filtering to improve visibility and tracking efficiency.
- Structured the application for easy extension into monitoring dashboards and observability tools.
- **Tech Stack:** React, Node.js, Express, MongoDB, JWT

Virtual Classroom Platform | Link — Feb 2026 - Feb 2026

- Built a full-stack virtual classroom enabling students to join courses and teachers to manage sessions from a single dashboard.
- Integrated real-time chat and class updates using Socket.IO, improving interaction by 50%.
- Developed secure RESTful APIs and MongoDB schemas for users, classes, and sessions management.
- Customized a responsive React interface, reducing navigation time by 30% across devices.
- **Tech Stack:** React, Node.js, Express, MongoDB, JWT

CERTIFICATES

- Build Generative AI Apps and Solutions with No-Code Tool - Udemy — Sep 2025
- Master generative AI & generative AI tools (ChatGPT & more) - Udemy — Jul 2025
- The Bits and Bytes of Computer Networking - Google — Oct 2024
- Introduction to Hardware and Operating Systems - IBM — Oct 2024

EDUCATION

Lovely Professional University — Punjab, India

Bachelor of Technology-Computer Science and Engineering : ***CGPA: 6*** — *Aug 2023 - Present*

New Public School — Chandigarh, India

Intermediate; ***Percentage: 60*** — *Apr 2022 - Mar 2023*

New Public School — Chandigarh, India

Matriculation; ***Percentage: 60*** — *Apr2020 - Mar 2021*
